CLAIMS

What is claimed is:

1   1.   A method for generating mapping content, comprising:

2   defining a first plurality of hexes having a first hex scale;

3   associating pluralities of micro-hexes with respective ones of the first plurality

4   of hexes, each of the micro-hexes having a second hex scale smaller than the first

5   hex scale; and

6   enabling mapping attributes to be assigned to selected hexes among the first

7   plurality of hexes and selected micro-hexes among the pluralities of micro-hexes.
